

# Spring Garden Survival Guide

# MARCH

WEEK 1		<p>As the weather warms up, be sure to open the doors and vents on your greenhouse on the warmer days, as this will help the air circulation.</p>		<p>Keep watch over new crops for the first signs of any pests in your garden.</p>		<p>Start planting vegetables ready for summer including peas, rhubarb, celery, leek, onions, and radishes.</p>	
WEEK 2		<p>Start preparing for summer by planting summer-flowering bulbs.</p>		<p>Repot any house plants being careful not to damage the roots.</p>		<p>Plant container-grown plants in the soil, being sure to dig a hole larger than the size of the container to let the plants grow properly.</p>	
WEEK 3		<p>Prune apple trees and other hardy fruit trees to ensure a new blossom this year.</p>		<p>Check over all of your garden structures and buildings to make sure they are in good order and do not need repairing or replacing.</p>		<p>If you have a compost pile be sure to turn it to allow it to aerate. If you don't have one already then this is a great time to start one.</p>	
WEEK 4		<p>Prepare your flower borders by adding fertiliser to the soil.</p>		<p>Start thinking about the herbs you want to grow this year and make sure you get some suitable pots if you don't have room for a separate herb garden.</p>		<p>If your lawn is starting to grow strongly again, be sure to get the lawn mower out regularly.</p>
